IFW/1636

U.S. Patent and Trademark Office

Ladies and Gentlemen:

Thank you for rejecting the rabbit
patent, Patent No. 6,924,413.

I hope in the future you will no
longer issue patents on any animals.

Our nation may become superior
scientifically and technologically, but we
shouldn't do so at the expense of our
souls. We should encourage development
of more humane testing. We should
make great strides in science but we
should also make great strides in
compassion.

Proud Supporter of The Fund for Animals
